Abstract: Cosmetics are the substance used to alter the appearance or fragrances of the human body. Nowadays the demands for herbal cosmetics in the world market are growing and are inevitable gifts of nature. There is a wide range of herbal cosmetic products to satisfy the need of women. In contrast to synthetic ones, herbal cosmetics are safe for human health. Herbal formulations like herbal lip balms, herbal lipsticks, herbal creams, herbal shampoos, and herbal paste have always attracted considerable attention because of their good activity and comparatively lesser side-effects with synthetic materials. Herbal Cosmetics are defined as the beauty products which possess desirable physiological activity such as enhancing, soothing appearance, healing, conditioning properties because of herbal ingredients.

Along all cosmetic products, Natural lip balms preparation are most widely used to increases the beauty of lips and add glamour touch and shine to the beauty. Lip balms provide a natural way to promote healthy and moisturized lips. Current cosmetic lip products are based on use of toxic chemical ingredients with various adverse effect. That is why it leads to study natural ingredients used to production of natural lip balm.

Keywords: Herbal lip balm, flavouring agent[orange powder], Vitamin C.

I. INTRODUCTION

In today’s fastest growing civilization demand for natural products whose production is safe to the environment has increased the production of natural cosmetics. Lip balm is considered as the cosmetic product like lipstick which is used to prevent lips darkness and protect again hazardous environmental factors. Natural lip balm preparations applied on the lips to avoid dryness and protect against adverse environmental pollutants that produces darkness to the lips. Natural lip balm helps to maintain and promote healthy lips. Vitamin C is mainly associated with the prevention of seasonal infections. This organic compound is a component of tablets and dietary supplements that strengthen immunity and improve the body’s ability to absorb iron. Of course, these are not the only applications of vitamin C! The cosmetics of the twenty-first century are also based on its beneficial properties.1-7

The main ingredients of lip balm:
- Bees wax
- Castor oil
- Cocoa butter
- Vaseline
- Beet root powder
- Vitamin C
- Orange powder

These ingredients provide consistency and work as emollients in the formulation.8-12

II. ANATOMY OF LIPS

The lips play role as organs which is design to grazing, suction and speech. It is combination of the skin, superficial facial, orbicularis muscle and muscles inserted around it. The margin of lips is converted with dry, red mucous membrane, continuous with the skin. The areolar tissue or submucous layer contains the coronary vessels which completely encircle the buccal orifice near the free margin of lips.

IV. RESULT AND DISCUSSION

In the last few decades, there has been a tremendous boost in the use of cosmetics by women. However, the hazards caused by these chemicals have come into the limelight very recently. Consumers can take safe and effective advantage of herbal lip balms after thorough clinical trials. Compared to other beauty products, natural cosmetics are safe to use. Synthetic colouring agents may cause allergic reactions and be found to be carcinogenic.
