➤ *MakeMyTrip :*

Founded in the year 2000, MakeMyTrip is an esteemed online travel company hailing from India. Boasting its headquarters in Gurugram, Haryana, this company offers an array of online travel services, ranging from airline tickets to domestic and international holiday packages, as well as hotel reservations, rail, and bus tickets. As of June 2023, MakeMyTrip has a whopping 146 energetic franchisees operating across more than 100 cities.[4] Furthermore, MakeMyTrip proudly boasts international offices situated in New York, Singapore, Kuala Lumpur, Phuket, Bangkok, and Dubai.[8]

➤ *Green Bus:*

Students at Dartmouth College are in charge of the Big Green Bus (BGB), an initiative that was started in 2005 to promote sustainability and renewable energy sources. In 2009, the Dartmouth students enhanced their effort by converting a 1998 MCI coach bus to run on waste vegetable oil (WVO), replacing the original old school bus. It started providing services for the home games of the football teams Birmingham and Aston Villa in August 2010. The Green Bus started offering commercial passenger services in September 2011.

The Green Bus, which enables drug users to follow the real-time whereabouts of their device via an iPhone app, took home the "Innovation of the Time" award at the 2010 Route One Operator Excellence Awards. Note should not be confused with Rugeley's Green Bus, which Midland Red purchased in 1974, or Warstones Motors t/a Green Bus Service, the Great Wyrley grounded machine company whose license was revoked in 2009.

➤ *Zingbus :*

India's Zingbus is an expanding provider of automated intercity transportation services. It offers visitors a safe, convenient, and worthwhile travel experience. Zingbus employs a platoon of seasoned professionals committed to attending to the demands of its clients. The business uses Whatsapp to provide round-the-clock support to its customer firms.

In vibrant cities, Zingbus couches are equipped with free WiFi, air conditioning, air exertion, washrooms, charging ports, and all the necessities for traveling.

One of the chic mobile ticket booking apps for individuals seeking a dependable and reasonably priced travel experience is Zingbus. It's also a great software for machine reservations, with many of options and top-notch customer support.

In general, Zingbus is advised for everyone seeking a comfortable and stress-free travel experience in India.[10].

➤ *Travelyaari :*

With its headquarters located in Bangalore and more than 3,500 machine companies listed on its website, Travelyaari was founded in 2008 by Prateek Nigam, Aurvind Lama, and Parthasarathi Sinha. The company provides more than 150,000 machine druthers per day and operates on more than 70,000 routes.

Since its founding, the company has provided transportation to more than 150 million individuals. The online machine reservation app from Travelyaari makes it possible to buy machine tickets right away. Announcements within the app can provide access to exclusive offers and recurring price reductions. Travelyaari guarantees its visitors the lowest machine booking experience.[10].

➤ *Ticket Goose:*

Another of India's fashionable machine-reserving online apps, TicketGoose serves more than 3,000 locations across the country with over 10,000 motorcars on 20,000 routes. You can easily order tickets using its iOS and Android apps in addition to its website. Founded in 2007 by Arun Athiappan and Karthi Northeastward, this Chennai-based company consistently delivers value, service, support, and the best usability by betting on people and customers. TicketGoose facilitates hostel and hack reservations in addition to machine reservations.[10].

➤ *Benefits of Online Booking System :*

• *Real-Time Online Bookings:*

One of the main advantages of a booking result is that visitors don't need to make inquiries first and wait for your response; additionally, you don't need to manually reuse these inquiries. Instead, all of the available dates will be visible to your guests directly, allowing them to book. But in order to facilitate future reservations, this will be instantly blocked so you won't have to lift a cutlet!

• *Vibrant Currencies and Languages:*

Nearly all rest conditioning organizers aim to connect with international visitors. Therefore, it's crucial that they have the opportunity to communicate at least in English, write in a chic case script in their native tongue, and make payments using their own currency. There is eventually a risk that a client will just bespeak with a contender if he is unable to understand what or how he can bespeak due to a language hedge. Perfectly, based on the client's IP address, the online booking system will determine the appropriate currency and language to use.

- *Creating and using Vouchers Through an Online Booking System:*

Testimonials are crucial for businesses for a variety of reasons. These comprise not only gift validations that are available for purchase, but also special elevations that encourage the promotion of your products. Regardless of the type of validations you employ, the booking system should make it possible for them to be effectively generated, managed, and accessible. Additionally, validations from external testimonial doors like Group on should be able to be entered, allowing your guests to redeem them on their own when making an online reservation.

- *Payment with PayPal:*

PayPal is an increasingly popular method of online payment because it's easy to use and secure. and by drug addicts from all over the globe. It establishes trust by demonstrating your appreciation for the safety and seclusion of your clients. You also know that you will accept direct, guaranteed online payments from your visitors at the same time. Therefore, PayPal should be a feature of any top-notch online reservation system.

- *Intelligent Timetable/Journal:*

A clear and concise booking or residency schedule gives stoners an overview of all reservations, capacity, and development for the required ages at a glance. This will make planning your resources much easier. It should also be feasible for the booking journal to be synchronized with previously used digital journals, like Outlook or Gmail, to prevent needless work.

- *Booking Software Phone and Online Support:*

When using software, you eventually come to a place where you need assistance from the creators. Nothing is more annoying than expecting assistance from the software house and not receiving the assistance that was promised during those times. Many times, all you need to quickly solve issues related to reservations, bookings, or capacity is a comprehensive help database. If, however, that isn't the case, you ought to be able to speak with the inventor over the phone as well as online. One small piece of advice: make sure to test the Support feature of the booking software as well!

- *Automated Emails Simplify Operations:*

Sending out routine standard emails about things like document reservations, reservation milestones, cancellations, etc. takes up far too much valuable time. It's laborious and tiresome work that a booking system should definitely automate. For example, after the online booking, a booking evidence should be transferred to the client's incontinent. The customer can be certain that the reservation has been made thanks to this. Not only should the booking system send evidence-mails to your guests, but it should also give them the option to be informed as well.

- *Reserving Operations via Smartphone and Tablet:*

Those who provide outdoor air conditioning services, in particular, typically have to conduct business while on the go and don't spend their days seated in front of a computer. Instead, they use a Smartphone or Tablet. The online booking system ought to function on a pall for this reason. Additionally, it will be automatically optimized and maintained in addition to being reachable from anywhere in the world.

- *Integration of Marketing Platforms:*

Make sure your booking result has colorful integrations across various marketing platforms when selecting it. For example, these could be Victor, GetYourGuide, EventimGuide, Jollydays, Kochschule.de, or Trip Advisor. These reservation doors boost availability for uninvited guests and, in a chic example, may also encourage a large number of reservations. It is imperative that the booking software automatically synchronizes these reservations. You continue to have complete control over the sizes, timing, and costs.

- *Secure Capital Operation:*

Obviously, a good booking tool should provide the first nine points mentioned above, or more, to ensure that your daily tasks are made a great deal easier. However, unless the tenth point is also satisfied, none of these functions will be useful at all. The most crucial element of all is that your data and generated capital are picked up securely by a trustworthy and secure company. which includes the fact that your plutocrat will be protected in case of bankruptcy. This is feasible if your capital isn't actually managed by the business; however, in the chic case script, a trustee account is established for you with a trustworthy bank that manages its own.[11].

III. METHODOLOGY

We desing this application using System Development Life Cycle (SDLC). It is process of understanding how Information System can support business requirements, designing the system. The System Development Life Cycle composes of four phases Planing, Analysis, Desing and Preparation[4].

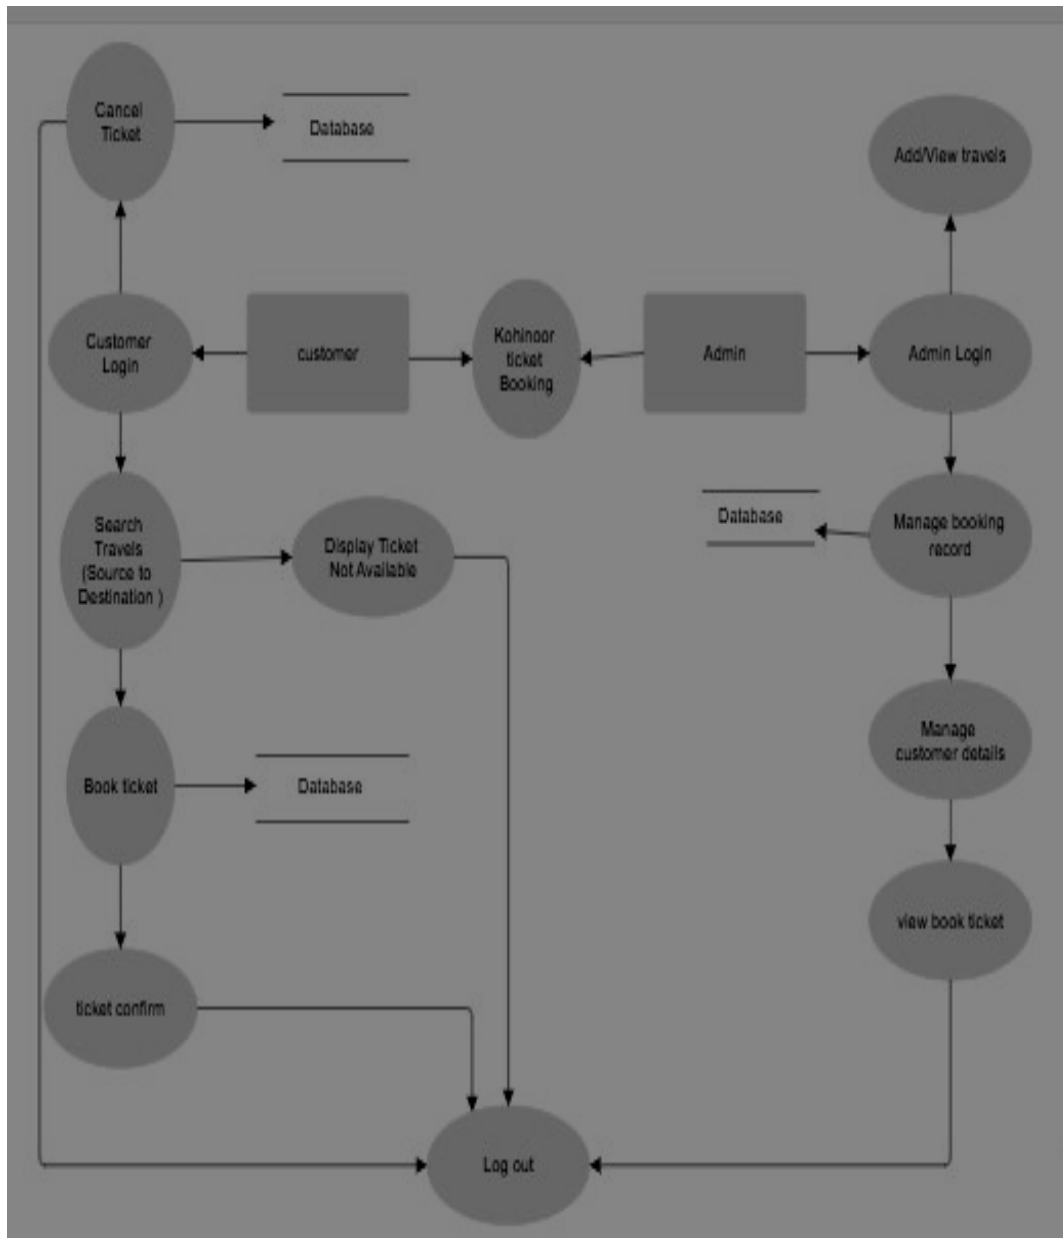

Fig 1 DFD 2 Diagram

➤ Objectives

- The main objective of our project is to make efficient financial management which is user friendly and at same time powerful. It manages the travel ticket booking. The main purpose of the project is to build an application program to reduce the manual work for managing the travels and at present tickets are issuing only at select outlets.
- Online ticket reservation system is manages the details of machine, Ticket booking, client, bus route. The capability of customer to cancel their booking. User operation rights in renewal and cancellation of payment.

IV. CONCLUSION

Online Ticket Reservation System is an operation where the client can be speak the ticket online and 24/7 hours a day from any place in the world. Customer can also interact with the ticket. System performance is also set up to be satisfactory. This is user-friendly application. Therefore online ticket reservation system target internal and external audiences. This is a benefit of using a online ticket reservation system.
