**Abstract:-**Every man's life experiences a Student life which is endless freedom and heaven throughout the entire life. But in recent days Television, News channels, Newspapers and Social media are given major priority to the Harassed student to pass information because of having high rating scale within the society. Harassed students incidents are frequently occurred in rural tribal agency area like highlighting incidents same time both at Adilabad district and state capital city of Hyderabad district and results came out with the favor of students by the latest digitalization of information technology effects. Apart from this teaching education, the students learned the process of a motivation of student's orientation class and teachers have to provide and show right path by motivation and through counseling only. As per the modern education system implemented and in well developed educational countries like Finland, Indian educational system are re-modified as teachers move with students freely by lovable teaching methods as per National Education Policy and Right to Education Act 2009 are telling that each schools management should provide a psychology teachers to the students who are backward in their education academic curriculum activities. But recently the some of the teachers are still harassing the students with having the minimum knowledge of rights of students. School management guidelines are provided to achieve their personal results in a short time period the teachers are pressured, stressed and finally, students are harassed who are not communicated by their teacher.

**Keyword:-**Digitalization, Heaven, Media, Motivation, Counseling, Psychology Teachers, Children's Rights.

## I. INTRODUCTION

As per Psychologist principles, educational philosophers said that Each and every Student are believing that either rain or thunder, sunset or sunrise, and light or shadow whatever will create and followed by himself only. So Childhood stage is the best stage for any man entire the life period. So many people are repeating their childhood life as the best role of his entire life. By the parent love at home and the instruction of educators, these are only the developing factors of the person at the stage of childhood. Finland is the role model of the educational system. It is a very smallest country in the world and it is almost 10% location area of Telangana State. Finland country's major revenue income is coming only by the education only. A Secret of Finland is by providing free and freedom of method using education. Here in Telangana, so many implementations are from the top of the level of decision-making authorities but still, the requirement of children's required freedom method of education was not implemented. By the lack of awareness of children's psychology mentality the schools are giving presser and punishment to the Children and crossing the limits of children's fundamental constitutions right.

The student's harassment commonly happens everywhere by the different ways of styles, by homework or late comer's students, shortage of attendance, for not responding to the teacher as per his expectation, school tuition and hostel fees, and parents are harassing students for their fulfillment of their expectations to his/her children. Finally, the helplessness of children is suffering from the teachers or parents. By this the latest technology using smart mobile or digital cam and electronic gadgets some of the students recording the incidents and spreading out by so many communicators like a press or social media etc..

## II. LITERATURE REVIEW

### A. India

The harassment of children in India is a crime but, in India beating children, scolding children, there was an option to file a case against either parents or a teacher or educational institutions. But here in India still no one supposes or ready to file a criminal case because as this it was not believing as a crime but thinking as a process of lifestyle development from the past of his/her parents.

### B. America

In America, the children's life is given more respect. The harassment of American students or children are taken seriously and there was a provision to treat as a criminal case and also put fine of a certain amount. And the implementation of criminal punishment is strictly followed by the united states of people.

### C. China

In China the special jail and prisons are available for the harassment of the China children or students, this jail's punishment period is the minimum of 1 year and maximum up to 5 years. As well as a large amount of fine is given as punishment. Once registering the case he/she must stay in jail without any consideration

### D. UAE

In UAE the parents, as well as educators teacher, have right to scold the children when the children are doing mistakes. But this has limits of scolding which is permitted in case he proved to punish by treating beating the parent or the educator's teachers will be punished by the law

### E. Srilanka

In Srilanka, the supreme court of Srilanka gave guideline to the fever of student's rights at school and other living outside of schools and ruled strictly maintains the guidelines

### F. Narve

Here in this country the students of scolding also treated as a big crime. Even the children are wanted to do mistake the parents or the elders are trying to motivate them and to give right path by motivation method only.

### G. United Kingdom (UK)

Here in this country the age below of 16 years are all free facilities are available like free travelling entire the country, and the age of under 12 years children's are appear single with his parents /guardians whose children's taking police custody

and take the details of them and to send his parents without any late as per the law of the country United Kingdom(UK).

### H. Swaziland

Here in this country children's are treated like as Gods, if anyone scolding or treated as beating they will be under prisons up to 10years. And also the people who are punished by the children's case are treated very badly to the next life.

### I. Briton

Here in this country the children's are scolding and beating is prohibited and the police officers and as well as National Social Organization people have rights to involve to punishment. And anyone has to option to quickly response rights against an accused person. Here on special rule who is the teacher scolding or harassment to the students the teachers can be treated to punishment as CORPORAL PUNISHMENT by 2years of punishment and also big fine.

## III. PURPOSE OF STUDY

The United States organization summit of commitment in the year 1992 the India participated and signed the rule and regulations of Childs rights to protections. As per commitment India must protect these special rights

- **Right to Live:** Any child in the world can live his/her own sustain of his capability to the development of to his/her entire life,
- **Protection Right:** Children's have to rights about their religion-based, community-based, gender-based living style rights. If anyone insulting or misbehaving, they will be punishable.
- **Development Right:** Children's have full rights individual development by mentally and physically, they can involve in any culture based activities.

Every day in the crime corner of the newspaper articles publishing and Televisions channel the crime news telecasting the harassment of student at schools level by homework, tuition fees and so many reasons the only children's are treated as helpless from the society which we developed law to the fever of children's and not to implementation by the child protection rights.

By the lack of teaching faculty of psychology teachers, the students are misbehaving so the children's are not treated as special children so the pupils are facing harassment problem from the teachers /management or parents. And from now a day's more educated children's who are using latest technologies of the telecommunication as well as smart mobiles and social media the children and children's parents are approaching by the using of technology.

### A. Hypotheses

The study has taken following hypothesis as it the hypothesis by Digitalization effects of student's harassment by educational institutions in the Telangana State.

- By the digitization effects, students are identifying their Child rights from the harassment
- Using Social media by the students/student's parents are easily approaching by media or concerned authorities to compliant
- The CC camera potage are some time help for the student's rights and misbehaving of educators
- Digitalization of effects in the school management also monitors the teachers
- Digitalization of school missing students have traceable by the GPS
- The Psychology teacher/counselor can easy identifying from the data gather by digitalization

## IV. METHODOLOGY

The modernization education and globalization of lifestyles the students/children are contacting to his/her parent every time by connecting each other by mobile networks or some social apps, the latest kidnapers and children thefts of security reasons the students are interaction to the parent essential through mobile by the internet technology by GPS. By these technologies using methods the children are protecting themselves and also protecting some other children rights against harassment of those. In this method using same as the harassment by children are finding out at educational institutions. By this method and management of educational institutions is the best method of protection to the children rights and as well as to monitor children's life at an educational institution. Some are as well infrastructure school maintaining CC camera at everywhere in the school for monitoring students as well as teachers.

### A. Sample of Design

The research has taken from 160students form details of the newspaper published an article and telecasted by television news channels of recent 2016-17 academic year of the from the Telangana state.

- 10 of harassment children who are studying day scholar, 10 of harassment children who are studying hostel students are living at metro city area whose parent are educators and having knowledge on electronic gadgets.
- 10 of harassment children who are studying day scholar, 10 of harassment children who are studying hostel students are living at metro city area whose parent are not educators and having knowledge on electronic gadgets.

- 10 of harassment children who are studying day scholar, 10 of harassment children who are studying hostel students are living at urban city area whose parent are educators and using knowledge on electronic gadgets.
- 10 of harassment children who are studying day scholar, 10 of harassment children who are studying hostel students are living at urban city area whose parent are not educators and having knowledge on electronic gadgets.
- 10 of harassment children who are studying day scholar, 10 of harassment children who are studying hostel students are living at rural area whose parent are educators and having knowledge on electronic gadgets.
- 10 of harassment children who are studying day scholar, 10 of harassment children who are studying hostel students are living at rural area whose parent are not educators and having knowledge on electronic gadgets.
- 10 of harassment children who are studying day scholar, 10 of harassment children who are studying hostel students are living at agency area whose parent are educators and having knowledge on electronic gadgets.
- 10 of harassment children who are studying day scholar, 10 of harassment children who are studying hostel students are living at agency area whose parents are not educators and having knowledge on electronic gadgets.

### B. Limitation of study

- The study exempted for the children who have involved in the criminal activities.

## V. CONCLUSION

The misbehaving of students should not be punished and teachers should try to motivate in the right way and educator them always to move freely, some kind of students are always behind the education of those of merit students, so educators are to be identified and try to solve student's problem without any hesitation. Students are to be self-motivated by them and to rectify their mistake is a better habit. Every time mistakenly behaving students are to identified and should take extra care by the educator or psychology counselors. School management gave protection to the weak students and only try to develop them by parent and students psychology consolors. And effects of only social media the students and student's parent are following daily media news and try to get the awareness of children rights and same as the management of schools authorities and government authorities also monitoring and motivation to the awareness of Childs rights.

By the globalization effects the awareness of digitalization's by using smart mobiles and internet facilities and the government authorities are introduced the smart school and e-techno schools and implementation of ICT projects effect the harassment children are coming out to the media but this was happening continuously in our educations from the earlier of

our education system, to change the mind set of teachers educators is to conduct psychological orientation programs, student mental development class orientations training class and given training by regular class in the holiday vacations period and the educators teachers have to try to know and the awareness of the children's act as per Indian constitutions rights.
